Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE ____ MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claims 1-7 have been examined and are pending.

Drawings

The proposed drawing correction is accepted. Formal drawing corrections still need to be submitted.

Response to Arguments

Applicant's arguments with respect to claims 1-4 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC ' 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Kocher et al (USP 6,327,661 B1).

As per claim 1, Kocher et al teach an encryption method wherein at least one cryptographic sub-operation is performed on digital data stored as at least one data bit word in a storage cell or a register, characterized in that during encryption of digital data, a data bit word generated on the basis of random numbers is stored in a storage cell before a data bit word is written therein such that the storage cell is pre-initialized with random data (column 5, lines 23-30).

As per claim 2, Kocher et al teach that the bit word based on random numbers is written into the storage cell by a processor (column 5, line 65—column 6, line 1).

As per claim 3, Kocher et al teach that the bit word based on random numbers is written into the storage cell via a direct connection between a random number source and the storage cell (column 5, lines 22-25)

As per claim 4, Kocher et al teach that the bit word based on random numbers is stored in the storage cell at an instant in time, which precedes the cryptographic sub-operation (column 5, lines 4-10 and column 7, lines 20).

As per claim 5, Kocher et al teach in that pre-initialization of the storage cell with random data is performed randomly during encryption of the digital data (column 5, lines 4-8).

As per claim 6, Kocher et al teach in that the data word written into the storage device comprises an operand (column 5, lines 4-8).

As per claim 7, Kocher et al teach in that the data word written into the storage device comprises an intermediate result of the encryption of the digital data (column 5, lines 4-8).

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
